Advanced Comfort Systems Romania| Politica de Mediu

Asigurarea cresterii Advanced Comfort Systems Romania pe baza unei dezvoltari durabile

Pentru a realiza acest scop managementul Advanced Comfort Systems Romania a decis sa integreze un sistem de management de mediu in sistemul de management existent bazat pe:

1. **Respectarea mediului si prevenirea poluarii**

In acest scop ne angajam, impreuna cu tot personalul Advanced Comfort Systems Romania, sa identificam aspectele de mediu si impactul lor, sa le controlam, sa reducem consumul de resurse neregenerabile si sa implementam actiuni de prevenire a poluarii.

2. **Respectarea cerintelor legale si a altor cerinte la care noi am subscris**

Ne obligam sa intelegem si sa asimilam legislatia nationala, Europeana si internationala in vigoare, sa aplicam cerintele acesteia si sa mentinem o relatie de parteneriat cu agentiile de protectia mediului. De asemenea, ne angajam sa asiguram compatibilitatea sistemului de management al Advanced Comfort Systems Romania cu cerintele standardului international ISO 140001.

3. **Ameliorarea continua a performantelor de mediu**

Sistemul de management implementat in cadrul organizatiei va asigura implicarea personalului Advanced Comfort Systems Romania prin constientizarea si instruirea acestuia referitor la protectia mediului, diminuarea consumului de resurse, prevenirea poluarii si asigurarea unei dezvoltari durabile prin colaborarea cu comunitatea locala.

Managementul Advanced Comfort Systems Romania va stabili obiective si tinte de mediu care sa asigure ameliorarea continuua a performantelor de mediu ale organizatiei, atingerea acestora fiind analizata periodic in cadrul reuniunilor de Analiza a Managementului.

Ma angajez personal pentru integrarea cerintelor de mediu in sistemul de management existent si pentru ameliorarea lui continuua având ca bază de pornire prevenirea poluării și protecției mediului având drept țintă ameliorarea continuă a performanțelor de mediu.

Ma voi implica personal pentru atingerea acestui deziderat si voi cere si sprijini implicarea activa a tuturor angajatilor Advanced Comfort Systems Romania prin stimularea muncii in echipa si a intelegerii importantei cresterii organizatiei noastre.

Advanced Comfort Systems Romania. Environmental Policy

Ensure the expansion of Advanced Comfort Systems Romania based on sustainable development

In order to achieve this goal, the Management of Advanced Comfort Systems Romania decided to integrate an Environmental Management System into the existent Management System based on:

1. Respect of the environment and pollution prevention.

In order to achieve this goal we commit ourselves, together with the whole personnel of Advanced Comfort Systems Romania, to identify the environmental aspects and their impacts, to control them, to reduce the consumption of non-renewable resources and to implement actions to prevent pollution.

2. Respect of the legal and other requirements to which we have subscribed.

We commit ourselves to understand and assimilate the applicable National, European and International legislation, to implement its' requirements and to maintain a partnership with the Environmental Protection Agencies. We also commit ourselves to ensure the compatibility of Advanced Comfort Systems Romania Management System with ISO 140001 international standard requirements.

3. Continuous improvement of environmental performances

The Management System implemented across the organization will ensure the involvement of Advanced Comfort Systems Romania personnel, through its' awareness and training concerning the Environment protection, the reduction of resources consumption, pollution prevention and the assurance of a sustainable development by collaborating with the local community.
The Management of Advanced Comfort Systems Romania will establish environmental objectives and targets, to ensure the continuous improvement of the organization's environmental performance, their achievement being reviewed periodically, within the Management Review meetings.

I personally hire myself to integrate environmental requirements into the existing management system and to continually improve it, based on the prevention of pollution and environmental protection, aiming at continuous improvement of environmental performance.

I will get personally involved into the achievement of this goal and I will demand and support the active involvement of all employees, through stimulating the team work and the understanding of how important the expansion of our organization is.
